

## **PRESS RELEASE**

### **Craven Dunnill Tiles Selected for NHS Health Centre**

Craven Dunnill, the ceramic tiles distributor, has supplied high quality, slip resistant floor tiles for the £6.8 million new-build NHS Health Centre at Alcester. The company was able to fulfil the detailed specification with one of its stocked, contract tile ranges, supplying 600 x 600mm porcelain floor tiles for the high footfall areas of the pharmacy, main reception area and corridors.

The Italian made, unglazed floor tiles feature rectified edges and a dark, textured grey surface, which are particularly suited to patients with impaired sight. The high quality porcelain tiles are robust, hard-wearing and easily maintained in pristine condition with regular washing. As such, they are proving highly practical and suited to the high foot traffic zones of the busy health centre.

Craven Dunnill offers an expert contract tile service, including advice on tile suitability, layout plans, ensuring multiple shipments are made from matching batches and liaison with appointed tile fixers, which was Tiled in Stourbridge on this project. Extensive tile stocks are held at Craven Dunnill's Bridgnorth warehouse for fast, nationwide delivery.
